OBJECTIVE

The "Founders Rotary Club Scholarship" project is a program that benefits economically 14 youngsters of academic excellence in poor situations with scholarships and support, in order to contribute to the retention of students of the "Universidad Pontificia Bolivariana" ensuring sustainable support to complete their studies in higher education and professional fulfillment as a mechanism to improve their quality of life and that of their families.

JUSTIFICATION

In higher education it is common for students to face different economic and social requirements that lead them to withdraw from the University, the pressure to generate revenue at home, the University costs (transport, educational tools, etc.) and their own complex social realities in which they live.

This program aims to financially help 14 youngsters of academic excellence from poor situations with scholarships and support during each semester until graduation.
